New York Times

## Deforestation of the Amazon come back strong ...

In the Brazilian zone, tree felling increased in 2015 for the first time in a decade and the demand for soybeans and other products grown in the jungle has caused similar deforestation in Bolivia, which implies a delay in the fight against climate change .

U.N

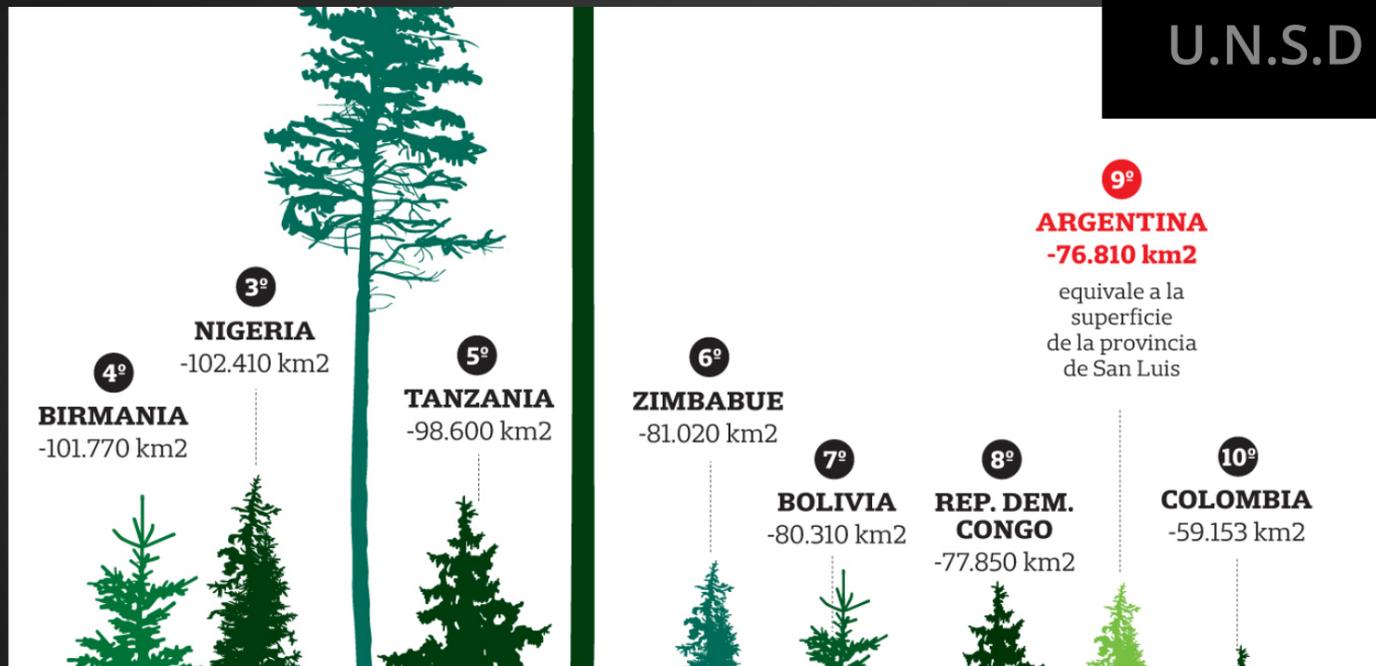

## U.N asks to reduce gas emissions greenhouse effect to avoid a "human tragedy".

Greenhouse gases, one of the main responsible for global warming.

In his report, he warns that countries must act faster to avoid climate deregulation, with devastating consequences.

# Climate Change

U.N.S.D

National Geographic

The ten countries that lost the most forest area in the last 25 years.

Environmental Indicators of the United Nations Statistics Division affirm that due to deforestation and urbanization, among other causes, Argentina lost 76,582 km<sup>2</sup> of forest. It is equivalent to the size of the province of San Luis.

"Before it's too late" is the new Nat Geo documentary, by Leonardo Di Caprio and Martin Scorsese.

The consequences of climate change on the planet affect not only the ecosystem, but its inhabitants, as well as animals that have lost their habitat due to deforestation for the production of products for human consumption.

# Sustainable Development

*...“refers to development that meets the needs of the present generation, without compromising the ability of future generations to satisfy your own needs.”*

The ultimate goals of sustainable development are:

- Improve the quality of life of all members of a community (all citizens of a country and the world).
- Ensure the integrity of life support systems (both human and non-human).

## RESTBOX Solution

### MECOX™ "The Sustainable Metal"

#### 2 Sizes:

MECOX™ 15" & Direct Cremation 13"

MECOX™ 17" & Direct Cremation 15"

70% recycled cardboard and 30% cellulose

100% biodegradable

Possibility of using it in inexpensive burials and cremations

Energy saving

Rational use of natural resources

*2 Trees = 1 Wooden Coffin*

*2 Trees = 100 MECOX™*

Environmentally correct

Our vision

Economically Viable

Socially fair

# Disaster and Pandemic Management

**RESTBOX**

DISASTER AND  
PANDEMIC  
MANAGEMENT KIT

CORPSE BAG

2 (TWO)  
CHISTRAPS

2 (TWO) PAIRS  
OF GLOVES

ECOLOGICAL  
COFFIN

Easy to transport

Waterproof

Lightweight: Weighs less than 5kg

Ideal for Catastrophes

It resists up to 225 Kg of weight and  
comes in 2 sizes: 15 "and 17"

# Homeless Solution

Biodegradable cover

Waterproof

Lightweight: Weighs less than 5kg

Low cost

It resists up to 225 Kg of weight and comes in 2 sizes: 15 "and 17"

*Laudato si'*

**RESTBOX**<sup>®</sup>  
ECOLOGICAL COFFINS by THE GREEN OPTION Co.

*..." We have never mistreated and hurt our common home as in the past two centuries "... it is essential to slow down to look at the reality of another way, collect positive and sustainable progress "...*

*Pope Francis*

According to the latest statistics, about 30,000,000 people die a year.

***Does it make sense in this century, existing a solution like RESTBOX™, to kill 60,000,000 trees? "***

***HELP US STOP THIS. YOUR GRANDCHILDS WILL THANK YOU***

***ANALYSIS ON HOW WOODEN COFFINS CONTAMINATE THE WATER BASES***

- There are studies that show significant increases in nitrate, ammonium chloride, sulfate and bicarbonate downstream of the land destined for cemeteries, attributable to leaching processes and significantly deteriorating the quality of the water resource.

**World Health  
Organization**

- An investigation carried out in Ohio, USA showed elevated levels of metals (Cu, Fe, Pb, and Zn) and metalloids (As) in cemetery soil samples at depths of casket placement.
- The wood used for the manufacture of coffins is usually processed for its preservation with inorganic salts that contain high amounts of toxic elements such as arsenic, copper, chromium, and other heavy metals, and later treated with organic compounds such as colorants, sealants, varnishes, waxes and polishes.

*World approval*
